EGMOND AAN ZEE COASTAL STRIP

A clearly designed path over the outer dunes links the different sections together. The differences between them have been enhanced to provide pedestrians with a variety of views and atmospheres. Special treatment of specific locations strengthens the relation between the village and the beach. The entrance to the beach has been widened and dune decks erected at prominent locations. The slightly raised wooden decks stand next to the main route and invite passersby to sit for a while and look at the sea. Blue-grey tiles on the promenade reflect the sky, creating a relationship between the boulevard and the sea.
